Portfolio: <https://ahoffman003.github.io/ahoffman003/>

TECHNICAL SKILLS

- **GIS & Mapping:** ArcGIS Pro, ArcMap, ArcGIS Online (Experience Builder, Dashboards, Survey123, Field Maps, StoryMaps), ModelBuilder, QGIS, AGOL Administration, ArcGIS Server Migration and Management
- **Remote Sensing:** ERDAS Imagine, LiDAR processing, ArcGIS Pro raster tools
- **Data & Programming:** Python (ArcPy), Arcade, SQL, PostgreSQL/PostGIS, Jupyter Notebooks, R, HTML, CSS
- **CAD & Drafting:** Bentley MicroStation, AutoCAD (ArcGIS Add-in Tools)
- **Professional Skills:** Technical documentation, metadata development, project coordination, client communication, staff training & onboarding

PROFESSIONAL EXPERIENCE

GIS Analyst II, Apex Engineering Group May 2025 - Present

- Build and maintain ArcGIS Online maps, Survey123, Dashboards, Instant Apps, and Experience Builder tools to support engineering workflows, field data collection, and client communication.
- Support water, sewer, and stormwater projects by preparing detailed system maps, updating asset records, and assisting with data-driven engineering decisions.
- Perform comprehensive QA/QC on spatial datasets to verify accuracy, resolve attribute and topology issues, and ensure consistency with engineering requirements and client expectations.
- Develop repeatable ArcGIS Pro workflows for data management, symbology, map templates, and project documentation in order to streamline project delivery and improve data consistency.
- Led development of a GIS web portal for the City of Detroit Lakes, migrating utility data into ArcGIS Online and building new feature layers for asset management, with staff training across departments.

Graduate Research Assistant, UMN - NW Regional Sustainability Development Program September 2025 - Present

- Led a GIS suitability and DSSAT crop-modeling feasibility study identifying 724,000 acres of marginal Northwest Minnesota farmland for sweet sorghum biofuel production, using ArcGIS Pro, DSSAT and automated Python/ArcPy workflows.
- Built an ArcGIS Online dashboard tracking well testing coverage and arsenic/nitrate contamination across counties, supporting the Well Aware groundwater testing and community outreach program.
- Developed Field Maps systems, dashboards, and maps for municipal tree inventory and replacement projects in Mahanomen and Crookston, Minnesota.

GIS Technician, RAMTeCH Software Solutions April 2023 – April 2025

- Mapped and maintained gas line infrastructure in ArcMap and ArcPro using as-builts and CAD drawings, ensuring data accuracy for utility operations.
- Conducted quality control checks on GIS data digitization and managed multi-user editing via branch versioning, ensuring spatial accuracy, regulatory compliance, and data integrity across the gas infrastructure dataset.

Digital Mapping Technician, Martinez Geospatial August 2022 – March 2023

- Processed and analyzed large geospatial datasets to produce ROW exhibits, planimetric CAD files, and high-accuracy topographic maps from stereo aerial imagery and LiDAR data for engineering and land development projects.

EDUCATION

Masters of Geographic Information Science Expected December 2026

University of Minnesota - Twin Cities, Minneapolis, MN

GPA: 4.0/4.0

Bachelor of Arts in Geography, Biology, and Environmental Science June 2022

Gustavus Adolphus College, St. Peter, MN

GPA: 3.7/4.0
